RE: Storm Sewer Installation
2023 Oakbrook Terrace Storm Sewer Project Stillwell Road

Dear Resident,

The City of Oakbrook Terrace is implementing a storm sewer project in your neighborhood. The project consists of approximately 5,000 feet of storm sewer from sizes ranging from 6" to 30". The existing sewer will be removed and replaced with new pipe with around 70 new catch basins and manholes. This work will be mostly in the parkways.

We will begin this project at Hodges Rd. and Leahy Rd (on the east side of the road) and install the storm sewer up to 16th St. We are looking to start the project in the later half of the week of 8/21. The goal is to have everything installed and each property restored by the end of October.

We will do our best to communicate with you (the resident) about the project status with the help of the City of Oakbrook Terrace and the engineering firm overseeing the project (Christopher Burke Engineering LTD.).

Thank you,

Nick Firrantello
